

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-8. (canceled).

Claim 9. (new): A telecommunication terminal, comprising:
an optical display;
a microprocessor having a menu structure having a plurality of different option functions;
a memory table in the microprocessor, the memory table including catch-words with each catch-word having a respective option function allocated thereto; and
an input device that accepts input from a user of the telecommunication terminal to select an option function without changing operating modes in the process, wherein, when a catch-word is selected by the user via the input device, a respective option function allocated to the catch-word is immediately implemented after the selected catch-word has been confirmed.

Claim 10. (new): A telecommunication terminal as claimed in claim 9, wherein the catch-words of the memory table are selected via at least one of alpha numeric input keys and scroll keys.

Claim 11. (new): A telecommunication terminal as claimed in claim 9, wherein, when a catch-word is selected by the user via the input device, a respective option function allocated to the catch-word is immediately presented to the user for editing to allocate a different option function to the catch-word in the memory table.

Claim 12. (new): A telecommunication terminal as claimed in claim 9, wherein the telecommunication terminal is at least one of a DECT handset and a GSM handset.
